To Whom It May Concern :

The potential for increased business both from the south and the north using the proposed widening plan for Harrah would be very beneficial for our business.

We deliver goods, as well as receive shipments on a daily basis and currently the roads are not only treacherous, but in some areas dangerous due to narrow width, potholes, and traffic back up, especially at the intersection near South Harrah Road and 59th - just north of the exit off Interstate 40.

Both our vendors' and our own vehicles would have fewer repairs if the super highway were to be created north on Luther Road. We travel on the Turnpikes quite frequently and that would be both a time saver and safer route if fewer stop signs, wider lanes, and smoother surfaces were created.

Thank you in advance for your consideration regarding awarding this grant to our area. It would be a great boost to many communities, including our own. Eastern Oklahoma County is growing quickly and beautifully, but our transportation routes have not caught up or got ahead of that growth. Now is the opportunity to allow our businesses to grow, flourish, and expand. We have amazing people and leaders and are ready to shine!!

Respectfully and thankfully,

Benita G. Peeler
