Re: Support for the T. I. G. E. R Discretionary Recovery Grant

Dear Mr. Pearson:

This letter is to express our full support for the application of a Transportation Investment Generating Economic Recovery Grant. This grant will help finance the north/south transportation corridor in the eastern parts of Logan and Oklahoma counties.

One of Coyle Public Schools' main goals is to support students and parents in the TRICITY 6006 targeted area. We feel with improved transportation there will be an increase in high quality jobs for families and strengthened economic development efforts. It is encouraging to see progress being made towards accomplishing these goals. Our community will profit in many ways from the road improvements which this grant will achieve. It will promote industrial and economic growth and insure a better quality of life.

We have a specific interest in the safety of our children, and better roads for transporting them to and from school will help accomplish this goal. The north/south corridor will provide a safer route for emergency responders, as well as improve their response time.

Thank you for your efforts on our behalf. We are committed to do anything we can to assist you in making this project a reality. Please contact any of the Coyle School administration if you need additional assistance.

Thank you,

Doug Evans
Superintendent

Josh Sumrall
High School Principal

Gary Larman
Elementary Principal
